SUMMARY

Ready to learn new skills and adapt to new environments. With my existing knowledge of MERN stack I would like to expand my skillset in backend technologies and frameworks. I'm a problem-solver with a passion for building user-friendly and interactive web applications. With my knowledge about Video editing and marketing, communication with different team will be easy and beneficial.

TECHNICAL SKILLS

HTML	Git, Github	Mongo DB, SQL
CSS	React js	Express js
JavaScript	Node js	Video Editing

PROJECTS

Front End Clones

SunDown Studio

Created clone of beautifully animated website www.sundown-studio.com. By creating this project I have learned a basic understanding of HTML, CSS, using CDN for different services like gsap, locomotive and etc. Used custom fonts by finding it with help of Chrome extension and using it on original website.
Other Similar Projects:

React js Project

Contact Manger Application

Created this project using React Components (class and functional components), JSX Props and states React hooks (useState and useEffect), Component lifecycle Conditional rendering Lists and keys Basic form, handling Project structure for a React application React routing, Setting up a JSON server Using Axios to call APIs in a React project CRUD operations Building a search filter functionality.

MERN Stack Project

Booking app

Created this project using Frontend: React.js, Styling: Tailwind CSS, Backend: Node.js, Express.js, Database: MongoDB Functionality: CRUD operations, User Authentication
